This group has a tenant hotline to provide us with legal advice.

I called and before they would provide the help I had to promise and set up a date for a meeting with them and all my neighbors in my buildings.

After the meeting they had me go door to door with them and collect \$10 memberships with there group.

They left with over \$400.

Their advice was wrong and almost got me evicted.

When my neighbors wanted them to come out again they wouldnt.

Now I find out they get huge government grants to provide this BAD service to tenants for free!

I would avoid these people at all costs!
