I have seen these people fight against things for tenants like lower property taxes since they make up about 20% of our rents!

When they came to my building they provided no help.

They were only interested in getting us to go door to door for them to collect "membership fees" of \$10 from every apartment when they already get \$500,000 a year from the city to organize and help tenants.

**I do not recommend this place.**

These fraudsters are only interested in bilking the government for more cash while they pretend to be siding with tenants. In reality, the positions they support are anti-tenant, from supporting illogical power meters - the ongoing costs of which will be borne by the tenants rather than having old refrigerator units replaced (the single greatest source of wasted power) - to supporting rent increases.

They are NOT out to help tenants, they are out to help themselves. Visit their message board and tell me that you can't see through their propoganda. Every second post is begging people to call their paper to get them more press, or to send them money. If they were actually doing something for you, surely they'd mention it once in a while instead of just crowing about what press they got today.

I guess for them press coverage stands in for actual achievements.

They disgust me.
